in the aftermath of the great war a remarkable wave of collective commemoration emerged but the aesthetic diversity of this period has often been overshadowed by a singular focus on the combatant experience primarily conveyed through fiction and memoir this selective historical narrative has fostered a homogenized memory of the war neglecting the rich array of cultural productions that also emerged alongside it commemorative acts challenges these prevailing assumptions about the memory of the great war and its literary expression in interwar france by spotlighting theatrical works that have largely been forgotten the book uncovers how the dominance of first person accounts of soldiers experiences has subtly yet powerfully narrowed our understanding of what the memory of the great war can encompass it explores how drama structurally at odds with the first person perspective and defined by its simultaneous modes of expression and reception has been lost to collective memory by examining the unique capacity of the dramatic form to capture war trauma commemorative acts offers insights that differ from those of other literary genres highlighting the theatre s potential to provide a more expansive and nuanced understanding of interwar memorial culture
